

YOU KNOW WHERE YOU WANT TO BE
WE CAN HELP YOU GET THERE

ALTERNATIVE ENERGY

In support of protecting our unique environment, 'add isrm' strives to ensure that alternative energy projects implement and maintain Health Safety and Environment (HSE) Management programs in accordance with their Corporate Social Responsibility policy

HEALTH SAFETY AND ENVIRONMENT

With our global partners we offer technical risk engineering and safety culture development programs, based on internationally accepted standards of better practice and continuous improvement.

Our wide range of related services includes (but is not limited to):

- > Pre-project commencement auditing, risk planning and management (HSE, political, security, environment, journey management)
- > Environmental assessments and management plans
- > Systematic HSE risk assessments and policy development
- > Development of crisis response and recovery plans / capabilities
- > Conduct of exercises and drills to test emergency and crisis management teams
- > Design and implementation of HSE management systems
- > Development of training support program, based on industry accepted standards
- > Safety culture assessments
- > Development of submissions for environmental approvals for sensitive environment projects

MEDIA MANAGEMENT

Organisations have to be conscious of their public image. Public perceptions of companies, their representatives and spokespeople can make an enormous and immediate difference to their reputations and profitability.

'add isrm' offers media management / response training in support of project and operational objectives.
