## **MEDIA MANAGEMENT**

Organisations have to be conscious of their public image. Public perceptions of companies, their representatives and spokespeople can make an enormous and immediate difference to their reputations and profitability.

While orchestrated media campaigns can be effective, it's often the ad-hoc, informal media appearances that have the greatest impact.

'add isrm' offers media management / response training in support of project and operational objectives.

**PROVIDING  
TRAINING SOLUTIONS FOR  
THE FUTURE**
